VACCINATIONS BY DEMOGRAPHIC CHARACTERISTICS

For information on vaccine eligibility and availability, or to schedule your Covid-19 vaccine, [click here](#). Percentages refer to the percentage of age group population fully vaccinated and boosted. Percentage vaccinated might appear to exceed the estimated number of individuals in a given age group or category. This could be due to increases in current resident numbers versus census estimates, which are based on 2019 census data.

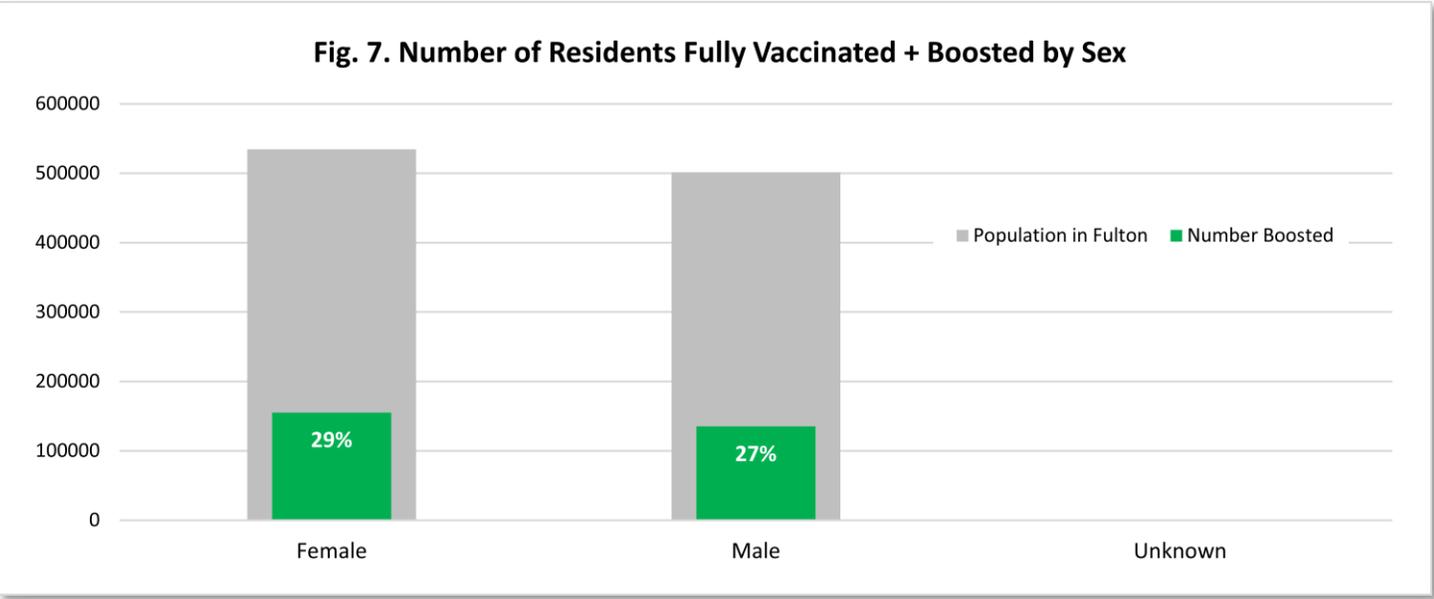

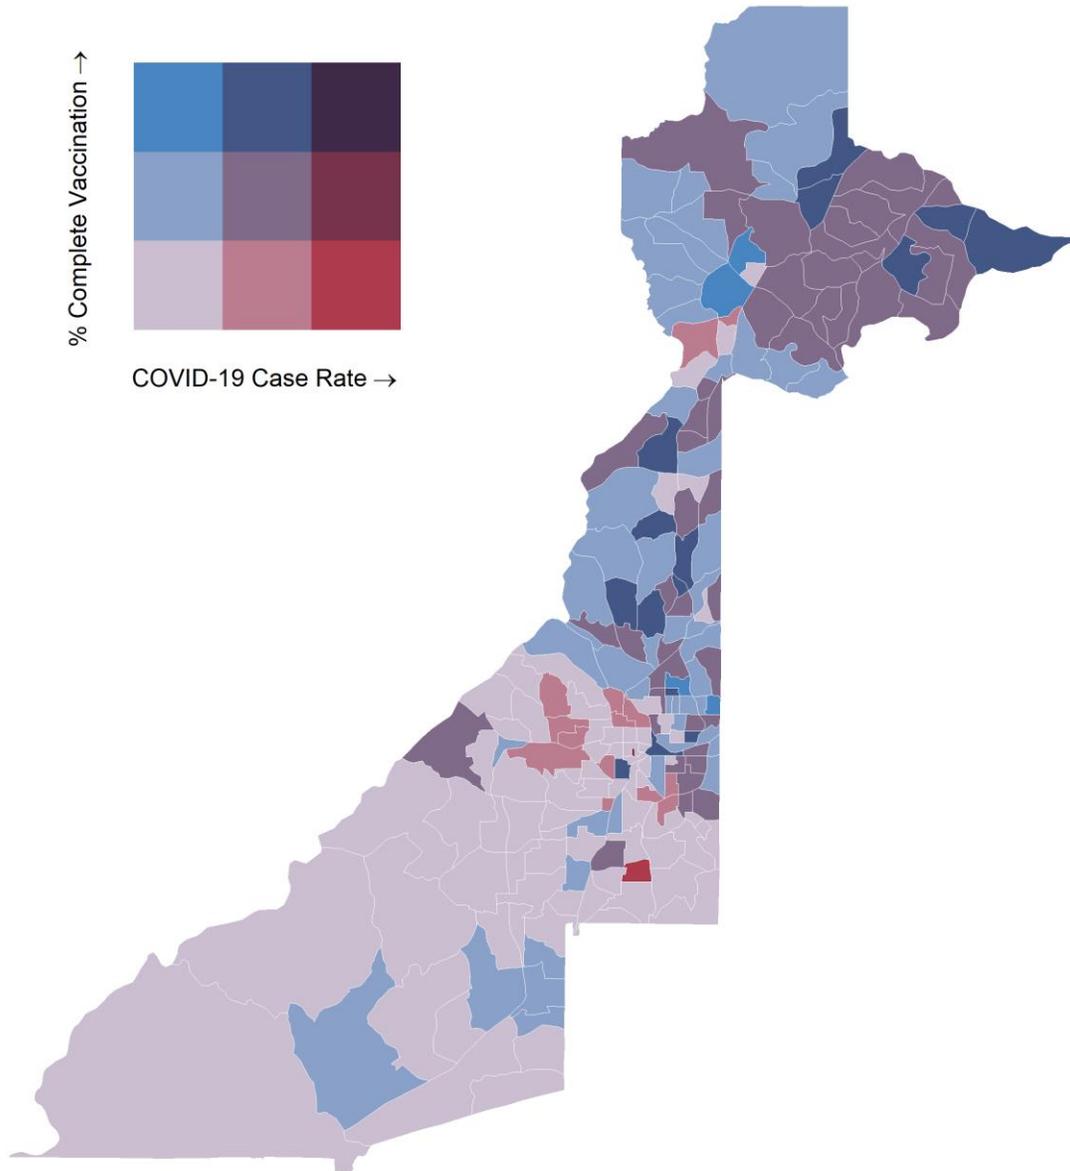

Fig. 8. Percent Complete Vaccination and COVID-19 Case Rate (per 100,000 population) by Census Tract January 31 – February 27, 2022

How to interpret these colors: The brighter the blue, the better. The upper most blue box indicates low COVID-19 case rates and high vaccination coverage. Red is not ideal as red indicates high COVID-19 case rates and low vaccination coverage. Colors in between indicate varying combinations of COVID-19 case rates and vaccination coverage. COVID-19 case rate reflects new COVID-19 cases diagnosed between January 31 and February 27, 2022 across Fulton County.
