*"Rub a dub dub
use less water in your tub"*

**Independence
High**

The Fulton County Department of Public Works would like to thank each student who participated in our annual Art Calendar Contest. The creative work of these students is both beautiful and thought-provoking, and plays an important role in our efforts to conserve and protect the water resources of Fulton County and our region.

Since 2000, the population of metro Atlanta has grown by over 1 million residents. According to the Metropolitan North Georgia Water Planning District, overall water use in the region has dropped more than 10% during that time. While many factors have contributed to this reduction in water use, we should not underestimate the impact of water education. As a water provider, we do our best to educate our citizens on the steps they can take to prevent pollution and to use water efficiently. At the same time, we rely on our residents to help their friends, family members, and neighbors to remember the importance of clean, safe water and to be good stewards of this precious resource.

We hope the artwork in this calendar, created by our own Fulton County students, will serve as your inspiration to conserve and protect water throughout this coming year and for years to come.

Water's Worth It

The Department of Public Works would like the citizens of Fulton County to join us as we support the Water Environment Federation's relaunch of the Water's Worth It® campaign. This public awareness initiative aims to promote our respect, efforts, passions, health, and future as it relates to water in our daily lives. As a part of this ongoing campaign, our department will highlight the ways that water is important to the things our public values most.

Respect water by taking the time to stop, think, and act. Our public education and outreach team offers public programming to Fulton County citizens of all ages using hands-on learning activities and displays to help you better understand the importance of clean, healthy, and safe drinking water in our everyday lives.

Our effort, our stewardship. Keeping our water resources flowing is a team effort. Making smart choices in how we use and conserve water on a daily basis, as well as reducing the amount of waste we generate, all help to create a network of citizens protecting the watersheds in our county.

Water is our passion. We'd like it to be yours, too. Over 200 professionals work diligently every day to manage this resource and to ensure customers receive outstanding service for the money they entrust to us through rates and fees. A career in water is a rewarding choice to provide an essential service to people living in Fulton County. We all need water and water needs talented, dedicated people like you.

Our health and our lives depend on it. Drinking water and wastewater treatment help us create safe and healthy water that our community uses daily and that we all appreciate. Touring one of our treatment facilities will help unmask the mysteries of where water comes from as well as where it goes when we are done with it.

Our future is worth the investment. Technology has advanced the process of clean water greatly, but creating a steady line of people who will dream up the future of water will help us maintain a flow of professionals working to prove that Fulton County Public Works believes that Water's Worth It®.

Save WATER one drop at a time!

Repair any leaks. 

Install drip irrigation systems. 

Don't let water run for a long time. 

Water is our life

Turn off faucet while brushing. 

Take short, 5-minute showers. 

Never use the toilet as a trash can.

Don't waste water
