

2024 Art Calendar

FEATURING ARTWORK FROM THE STUDENTS OF FULTON COUNTY

Cycles of Water

The Fulton County Department of Public Works would like to thank each student who participated in the 2024 Art Calendar Contest. Their unique and original artwork, aimed at spreading awareness about our precious and limited water resources, is truly inspirational. Out of the 215 entries we received, we selected 22 pieces to be featured in our 2024 art calendar. It is our hope that through this contest, we will inspire a new generation of environmental stewards, who will be passionate about protecting our water resources.

As Fulton County and the metro Atlanta region continue to grow, it's essential that we conserve water by reducing usage and identifying sources of pollution. By conserving water in our daily lives, we play a vital role in maintaining the balance of the water cycle and preserving our water resources for the future. We must all come together to ensure that clean and safe water is available to all residents of Fulton County, regardless of where we live. Let the stunning artwork created by these students be a reminder to us all that protecting our water resources must be a priority.

Protecting Water, One Drop At A Time!

Water is an incredible substance. It quenches our thirst, nurtures plant life, and plays a vital role in our community. The Fulton County Department of Public Works is dedicated to protecting and conserving our precious water resources through robust infrastructure, efficient water use, and engaging environmental education programs. As stewards of the Chattahoochee River, we firmly believe that the best way to ensure a clean and sustainable water supply for future generations is by taking purposeful action today.

This year, our calendar theme is "Cycles of Water." The water cycle is a perpetual journey, with water transforming everything it touches as it travels the Earth. Imagine following a single droplet of water on its incredible voyage. The amazing water cycle has unfolded over billions of years, showcasing nature's remarkable ability to recycle water. However, humans can inadvertently disrupt this never-ending process, making water conservation even more crucial. Water is a finite resource and as our population grows, so does the demand for this precious commodity. That's why water conservation matters.

- **Securing the Future:** Water conservation ensures there will be enough for future generations. The water you save today may be the water someone else needs in the future.
- **Protecting Ecosystems:** Freshwater ecosystems are vital for wildlife and plant life. Excessive water use can harm these ecosystems, disrupting the balance of nature.
- **Reducing Energy Consumption:** The water you use at home requires energy for pumping and treatment. Using less water not only conserves water but also saves energy, benefiting our planet.
- **Saving Money:** Conserving water leads to lower water bills for your family. It also reduces energy costs related to heating and pumping water.

Excessive water usage can cause disruptions, leading to problems like water shortages. Water conservation maintains the smooth operation of the water cycle. When we use water wisely, we alleviate the stress on the cycle, ensuring there's sufficient water for all living things. Simply turning off the faucet while brushing your teeth conserves water. This small action reduces the water going down the drain, assuring more water remains in rivers and lakes, ready to evaporate, condense, and fall as precipitation.

Did you know that when it rains, the water running down the streets can pick up all kinds of unwanted things like litter, pesticides, and heavy metals? If these pollutants enter the storm drain system, they can end up in our precious waterways! Keeping our storm drains clear is essential for protecting our waterways. By preserving water in our daily lives, we contribute to the balance of the water cycle. We are water cycle superheroes, working to ensure that the water adventure continues without interruption. So, the next time you encounter a drop of water, remember it's on an extraordinary journey. It's up to us to keep that journey going by conserving and protecting our water, drop by drop.

For more information on how you can become an environmental steward in our community or participate in other programs provided by the Department of Public Works, please visit our website at www.fultoncountyga.gov/services/water-services/public-education-and-outreach.

Water is Everything! So how can we conserve it?

Take shorter showers.

Wash larger loads
and use cold water
when washing clothes

Don't pour paint, cleaning
products, medicine, or
other pollutants down
the sink or drain.

Don't litter and pick it
up whenever you can
