Compared to the State of Georgia, which has 52% of its population fully vaccinated, Fulton County is doing better than the state.

Fig. 1. Both Georgia and Fulton County are below the White House goal of having 70% of adults with at least one dose.

**White House 70% Goal**

- Georgia: 59%
- Fulton County: 63%
VACCINATIONS BY DEMOGRAPHIC CHARACTERISTICS

Fig. 2. Number of Residents with At Least One Dose By Age

For information on vaccine eligibility and availability, or to schedule your Covid-19 vaccine, click here. Percentages refer to the percentage of age group population with at least one dose. Percentage vaccinated might appear to exceed the estimated number of individuals in a given age group or category. This could be due to increases in current resident numbers versus census estimates, which are based on 2018 census data.

Fig. 3. Age Distribution Among All Fulton Residents with At Least One Dose
N = 642,859

25-64 year olds account for 63% of all residents with at least one dose.

Fig. 6. Number of Residents With At Least One Dose by Ethnicity

- Population in Fulton
- Number Vaccinated

- Hispanic: 53%
- Non-Hispanic: 58%

Fig. 7. Number of Residents with At Least One Dose by Sex

- Female: 65%
- Male: 61%
- Unknown: 0%
Fig. 8. – Fulton County Residents with At Least One Dose by Census Tract
**Fig. 9. Percent Complete Vaccination and COVID-19 Case Rate (per 100,000 population) by Census Tract, November 8 – December 5, 2021**

*How to interpret these colors:* The darker the blue, the better. The upper most blue box indicates low COVID-19 case rates and high vaccination coverage. Red is not ideal as red indicates high COVID-19 case rates and low vaccination coverage. Colors in between indicate varying combinations of COVID-19 case rates and vaccination coverage. COVID-19 case rate reflects new COVID-19 cases diagnosed between November 8 and December 5, 2021 across Fulton County.
